## Sinapse sheetfed simulator used at WorldSkills Abu Dhabi 2017

Sinapse is proud to announce the use of the **SHOTS™** Sheetfed offset simulator for the 5th time as an evaluation tool for [WorldSkills Abu Dhabi 2017](#), 14-19 October 2017.

Our sheetfed offset simulator **SHOTS** will be used in the competition. Each contestant will have an interface in their own language, with the judges also able to choose any language to review the results.

Competitors will use the simulators to demonstrate their process control and problem-solving skills. Simulators can introduce problems (bad adjustments, worn components, poor materials) that would be impractical to reproduce on the real presses.

The competitors will be judged on their ability to recognize and solve problems, and to do so at the lowest production cost.

*Sinapse is the world's leading supplier of training simulators for flexo, gravure and offset presses.*

For any comments or questions contact [Thierry Mack](#).
