

## WHAT'S NEW WITH SUITE 8

We are pleased to announce the release of the SUITE 8 of our print simulators.

Our products follow the new trends and are more and more web-based to offer flexible training solutions.

Two types of installations are now possible with Version 8:

- Standard perpetual Software locally installed on a computer with group management (DLMS) through the internet (as previously)
- Use of Software in the cloud with subscriptions.

### SUITE 8 NEW FEATURES: designed to meet your training needs

- **Simulators now available in the Cloud**
  - **No local installation, no maintenance**, software is installed and maintained by Sinapse in the Cloud.
  - **Simulators are always available from anywhere.**
  - **They can be used with any platform:** PC, MAC, tablets, Ipad, Android, smartphones.
  - **More flexibility with our subscription packages** (monthly, quarterly, annual) to match your exact needs.  
**Use other simulators or more simulators over short periods of time at attractive prices.**  
You are equipped with 2 Shots but have 10 students during 1 month? Or you need to teach flexo but have no simulators?  
It's now possible to buy accounts for a few months for any of our simulators and use them over the internet. Contact us if you have such projects.  
**Note: For groups using the same internet network, a minimum bandwidth of 1MB per user per session is necessary.**
- **An account in the Cloud is included for each trainer** for the duration of the subscription or support contract.

#### SINAPSE Print Simulators

- **Customize your training tool:** create and publish your exercises and print jobs and easily assign them to your students, thanks to the new Publication Module of the DLMS.
- **Worldskills Sao Paulo 2015 exercises** have been integrated in the Sheetfed simulator **and new exercises** have been designed to improve skills for future Worldskills.
- **New print jobs and exercises** also available in **Flexo**
- **Touch console now available for Flexo**  
Same hardware as TouchConsoles for SHOTS and Heatset.  
Add a TouchConsole module and 3 screens to transform your simulator into a realistic press Console!
- **Even more statistics in the DLMS!**
  - Statistics of the sessions are provided to the administrators and trainers. They show for each group and user: completed exercises, beginning of sessions and time spent.
  - You can now schedule your training sessions with beginning and end dates.
