

Release date: October 2023

WHAT'S NEW IN THE SINAPSE CLOUD

Features available with the CLOUD environment.

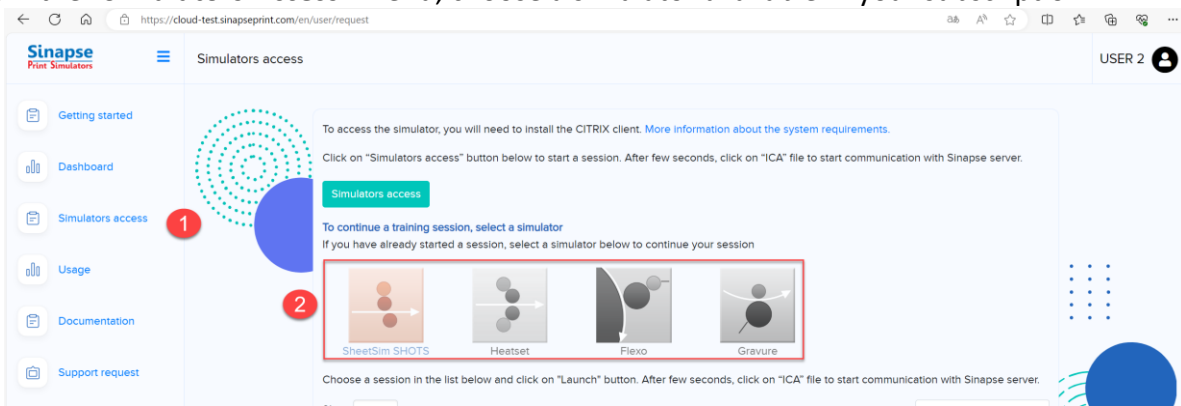

Audience: Users

2 new features to save time in setting simulators and access to exercises. Before launching with the Citrix app, you will have the option to check and modify the simulator configuration (user profile) and select a session to start an exercise.

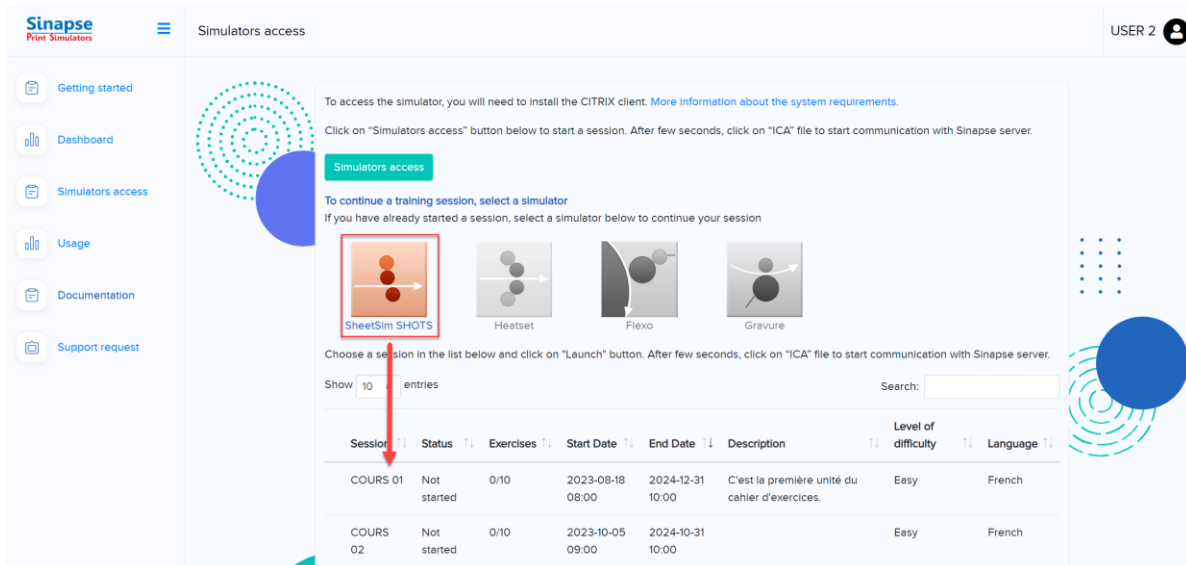

1 – Select a session before accessing the simulators

Before connecting to the simulator, you will now be able to see the list of sessions assigned by your trainer and select one of them to access it directly.

From the "Simulators Access" menu, choose a simulator available in your subscription.

After selecting the simulator, you will see the list of available sessions:

Select a session and click the "Launch" button. The session with the Citrix server will be initiated. Select the generated ICA file as usual to launch the simulator.

The screenshot shows the 'Simulators access' page in the Sinapse Print Simulators interface. The page includes a sidebar with navigation options like 'Getting started', 'Dashboard', 'Simulators access', 'Usage', 'Documentation', and 'Support request'. The main content area contains instructions on how to access the simulator and a table of sessions. A red circle with the number '3' highlights the 'Launch' button in the first row of the table.

Session	Status	Exercises	Start Date	End Date	Description	Level of difficulty	Language
Launch COURS 01	Not started	0/10	2023-08-18 08:00	2024-12-31 10:00	C'est la première unité du cahier d'exercices.	Easy	French
COURS 02	Not started	0/10	2023-10-05 09:00	2024-10-31 10:00		Easy	French

You will automatically be taken to the list of exercises for the selected session. Choose an exercise from the list to continue your work.

The screenshot shows the 'SHEETSIM SHOTS' exercise list page in the Sinapse Print Simulators interface. The page displays a list of exercises with columns for Status, End Date, Completion Date, Time Limit, Nb Tries, Run if success, Given Grade, and Obtained Grade. A 'Simulators access' button is visible at the bottom of the page.

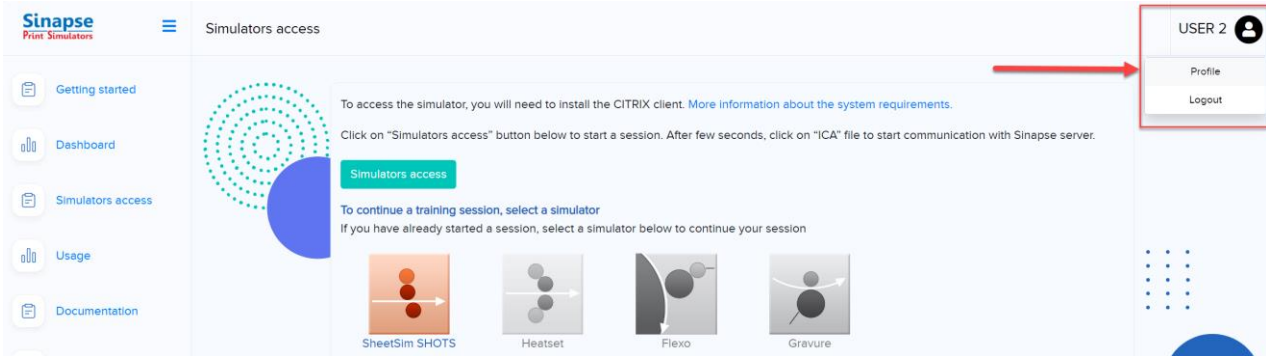

Exercises	Status	End Date	Completion Date	Time Limit	Nb Tries	Run if success	Given Grade	Obtained Grade
exercice 01-a	Not Solved	2024-12-31 10:00				Yes		
exercice 01-b	Not started	2024-12-31 10:00				Yes		
exercice 01-c	Not started	2024-12-31 10:00				Yes		
exercice 01-d	Not started	2024-12-31 10:00				Yes		
exercice 01-e	Not started	2024-12-31 10:00				Yes		
exercice 01-f	Not started	2024-12-31 10:00				Yes		
exercice 01-g	Not started	2024-12-31 10:00				Yes		
exercice 01-h	Not started	2024-12-31 10:00				Yes		
exercice 01-i	Not started	2024-12-31 10:00				Yes		
exercice 01-j	Not started	2024-12-31 10:00				Yes		

Note: by clicking on the button **Simulators Access**, you still have the possibility to choose the simulator and a working session from the DLMS.

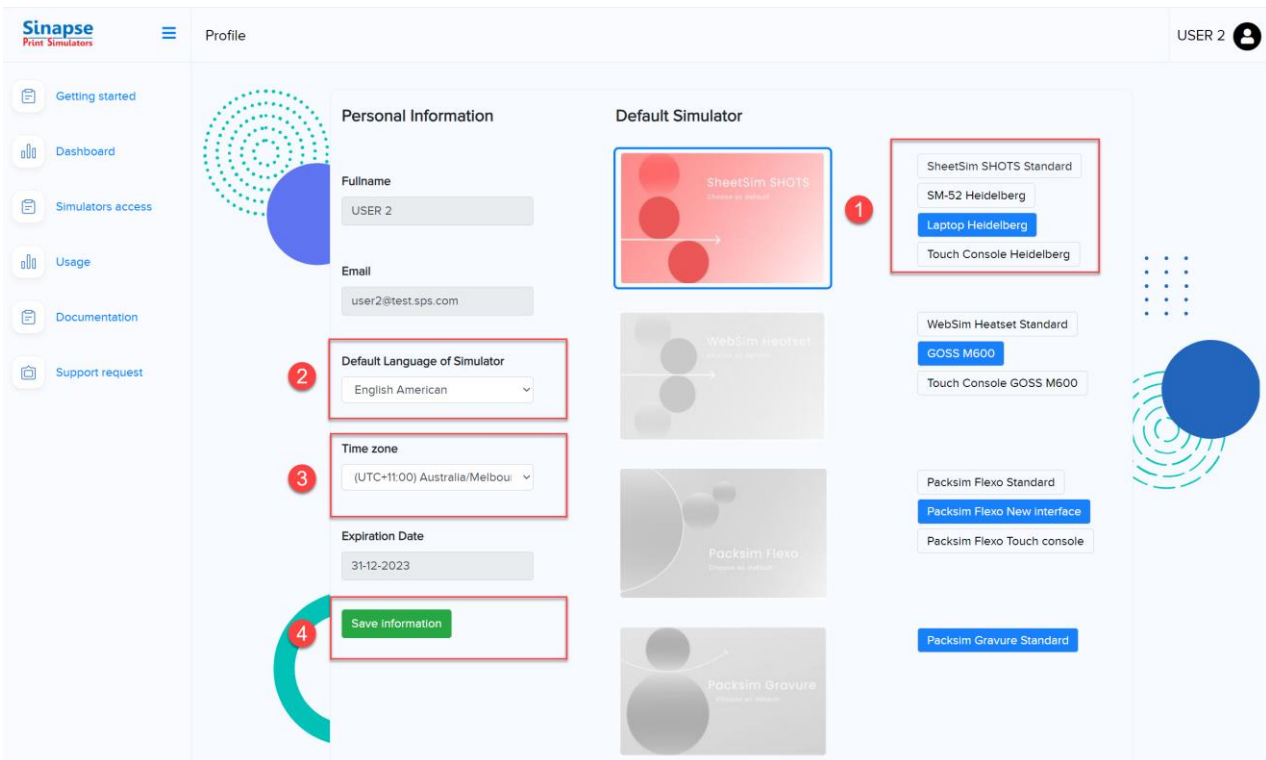

2 – Manage the user profile from the Cloud page

You now have the option to edit your user profile from the home page of the Cloud app.

Select the Profile option at the top right,

You will be taken to a page that is identical to the one that exists in the DLMS.

As a reminder, from the profile, you can:

1. Set the default configuration of the simulator, depending on the screen resolution of your equipment.
2. Define the default language of the simulator interface. If the selected language does not exist in the chosen simulator, English will be applied by default.
3. Check your time zone to adapt the date of your session reports to your geographical location.

Note: It is still possible to change these settings from the DLMS application.

We hope these new features will help you to manage your training in the cloud.

Kind regards
Sinapse Print Simulators
