

Sinapse Sheetfed Simulator Adopted for WorldSkills 2013 Competition

Sinapse is proud to announce the choice of our Sheetfed offset simulator SHOTS for the 3rd time as an evaluation tool for the WorldSkills 2013 Offset Printing competition to be held in Leipzig July 2-7, 2013.

In order to allow all contestants more “printing time” and to be able to assess a wider range of skills, the competition will **now** include **seven SHOTS Sheetfed Training Simulators** from **Sinapse Print Simulators** as well as two **Heidelberg SM 52** presses.

SheetSim-SHOTS simulator

The simulator was first used at Worldskills 2009 in Calgary. Since that date, cooperation between Sinapse and Heidelberg has ensured that the competitors have the same user interface on both press and simulator (SM52).

NEW for 2013: an **X-Rite densitometer** interface will be available in the simulator, as the X Rite densitometers will be used for the color control on the press. A TechKon Espresso densitometer interface is already present in the current version.

If you are at the show, please stop and watch the Offset competition, there will be Sinapse personnel present to answer any of your questions.

Sinapse Print Simulators, as its name implies, is specialized in press training simulators, and has more than over 2000 licenses installed over the world.

Sinapse manufactures press simulators for heatset (**WebSim-Heatset**), coldset (**WebSim-News**), sheetfed (**SheetSim-SHOTS**), gravure (**PackSim-Gravure**) and flexo (**PackSim-Flexo**) printing.
